VIRTUAL EQUAL ACCESS SERVICE2. General Regulations (Cont'd)2.3 Obligations of the Customer (Cont'd)2.3.11 Claims and Demands for Damages (Cont'd)

- (D) The customer shall defend, indemnify and save harmless KNAD from and against any suits, claims, losses or damages, including punitive damages, attorneys' fees and court costs by the customer or third parties arising out of any act or omission of the customer in the course of using services provided under this tariff.

2.3.12 Coordination with Respect to Network Contingencies

The customer shall, in cooperation with KNAD, coordinate in planning the actions to be taken to maintain maximum network capability following natural or man-made disasters which affect telecommunications services.

2.3.13 Jurisdictional Report Requirements(A) Jurisdictional Reports

- (1)(a) When a customer orders Feature Groups(T)(x) A or B Switched Access Service, the Customer shall state in its order the

projected interstate percentage for

interstate usage for each Feature Groups A or B Switched Access Service group ordered. The term group shall be construed to mean single lines or trunks as well. If the customer discontinues some but not all of the Feature Group B Switched Access Service in a group, it shall provide the projected interstate percentage for such services which are remaining.

- (b) Pursuant to Federal Communications Commission Order FCC 85-145 adopted April 16, 1985, Feature Group B interstate usage is to be developed

as though every call that enters a
customer network at a point within
the same state as that in which the (T)(x)

VIRTUAL EQUAL ACCESS SERVICE5. Ordering Options for Switched Access Service (Cont'd)5.2 Access Order

An Access Order is used by KNAD to provide to a customer Access Service as follows:

- Switched Access Services as set forth in Section 6. following.
- Other Services as set forth in Section 5.1.2 preceding.

When placing an order for Access Service, the customer shall provide, at the minimum, the following information:

- For Feature Group A Switched Access Service, the customer shall specify the number of lines and the first point of switching (i.e., dial tone office), the Local Transport options and Local Switching options desired. In addition, the customer shall specify whether the ordered line(s) is for FX/ONAL service or MTS/WATS-type service. If the customer specifies MTS/WATS-type service, it shall also specify which lines are to be arranged in multiline hunt group arrangements and which lines are to be provided as single lines.
- For Feature Group B Switched Access Service, the customer shall specify the number of busy hour minutes of capacity (BHMC) or trunks needed to carry traffic from the end office of a Routing Exchange Carrier set forth in Section 9. following to KNAD's central access tandem by type of BHMC and Local Transport options and Local Switching options desired. This information is used to determine the number of transmission paths as set forth in 6.5.5 following. The basic traffic type must also be specified using the same categories as described in 6.1.1 following, to enable efficient provisioning and billing functions.
- For Feature Group D Switched Access Service, the customer shall specify the number of busy hour minutes of capacity (BHMC) or trunks needed to carry traffic from the end office of a Routing

VIRTUAL EQUAL ACCESS SERVICE5. Ordering Options for Switched Access Service (Cont'd)5.4 Access Orders for Services Provided by KNAD and Exchange Telephone Companies (Cont'd)

(A) (Cont'd)

- (1) When Switched Access Services are ordered to KNAD's central access tandem, the customer will place the order with KNAD. The customer must also supply a copy of the order to each Exchange Telephone Company involved in providing the service and subtending KNAD's central access tandem.
- (2) When Switched Access Services are ordered to a point of termination listed in Section 8. following other than KNAD's central access tandem, the customer will place the order as follows:
 - (a) For Feature Group B Switched Access Service, (T)(x) the customer must place the order with KNAD. The customer must also supply a copy of the order to each Exchange Telephone Company involved in providing the service and subtending KNAD's central access tandem. (T)(x)
 - (b) For Feature Groups A and D Switched Access Service, the customer must place the order with the Exchange Telephone Company in whose territory the end office is located. The customer must also supply a copy of the order to KNAD.
- (3) For the Switched Access Services ordered set forth in (1) and (2) preceding, the customer must also supply a copy of the order to the Exchange Telephone Company in whose operating territory a customer premises is located and any other Exchange Telephone Company involved in providing the service.
- (4) For initiation, additions, changes or deletions to the Interim NXX Translation code(s), the customer must place an order with the carrier who provides the Interim NXX Translation. The customer must also provide a copy of the order to the Exchange

VIRTUAL EQUAL ACCESS SERVICE6. Switched Access Service (Cont'd)6.1 General (Cont'd)6.1.1 Feature Group Arrangements and Manner of Provision
(Cont'd)(B) Feature Group A (FGA)

FGA Access, which is available to all customers,
provides line side access to KNAD's end
office

switches with an associated seven digit local
telephone number for the customer's use in
originating communications from and terminating
communications to an Interexchange Carrier's
Interstate Service or a customer - provided inter-
state communications capability.

The customer must

specify the Interexchange Carrier to which the FGA
service is connected or, in the alternative,
specify the means by which the FGA access
communications is transported to another state.

(C) Feature Group B (FGB)

(T)(x)

FGB Access, which is available to all customers,
provides trunk side access at a customer's point
of termination with an associated uniform
950-0XXX or 950-1XXX access code for the customer's
use in originating and terminating communications.
A more detailed description of FGB Access is provided
in 6.2.2 following. (T)(x)

(D) Feature Group D (FGD)

FGD Access, which is available to all customers,
provides trunk side access at a
customer's point of
interconnection with an associated uniform 10XXX
access code for the customer's use in originating
and terminating communications unless a Routing
Exchange Carrier's end office is unable to
provide a uniform 10XXX code.

(DIAL-IT) Network Services. Additionally, non-access charges will also be billed for calls from a FGD trunk to another customer's service in accordance with the customer's applicable service rates when KNAD performs the billing function for that customer.

Calls in the terminating direction will not be completed to 950-OXXX or 950-1XXX access codes, local operator assistance (O- and O+), and 10XXX access codes. FGD may not be switched, in the terminating direction, to Switched Access Service Feature Groups A, B, or D.

(T)(x)

The customer will also be billed access charges by Routing Exchange Carriers and other Exchange Telephone Companies for the provision of access service in their operating territories between a KNAD premises listed in Section 8. following and the end offices served by KNAD's central access tandem.

- (5) FGD switching will be arranged to accept calls from the telephone exchange service locations without the need for dialing the 10XXX uniform access code. Each telephone exchange service line may be marked with a code to identify to which 10XXX code its calls will be directed for interLATA service. The access code for FGD switching is a uniform access code of the form 10XXX unless a Routing Exchange Carrier's end office switch is unable to provide a uniform

10XXX code. A single access code will be the assigned number of all FGD access provided to the customer by KNAD. No access code is (x) Filed pursuant to Special Permission No. 94-174 to withdraw material filed under Transmittal No. 2 without it becoming effective.

VIRTUAL EQUAL ACCESS SERVICE6. Switched Access Service (Cont'd)6.2 Provision and Description of Switched Access Service Feature Groups (Cont'd)6.2.5 Feature Group D (FGD) (Cont'd)(A) Description (Cont'd)

(5) (Cont'd)

required for calls to a customer over FGD Switched Access Service if the end user's telephone exchange service is arranged for presubscription to that customer. Where no access code is required, the number dialed by the end user shall be a seven (7) or ten (10) digit number, where appropriate, for calls in the North American Numbering Plan (NANP). The form of the numbers dialed by the end user is NXX-XXXX, 0 or 1 + NXX-XXXX, NPA+ NXX-XXXX, 0 or 1+ NPA + NXX - XXXX, and for International Direct Distance Dialing (IDDD), 01 + CC + NN or 011 + CC + NN.

The end offices of the Routing Exchange Carriers that are listed in Attachment 1 are unable to provide a uniform 10XXX code.

- (6) When a customer has had FGB access and subsequently replaces the FGB access with FGD access, at the customer's request and where facilities permit, KNAD will, for a period of ninety (90) days, direct calls dialed by the customer's end users using the customer's previous FGB access code to the customer's FGD access service. The customer must be prepared to handle normally dialed FGD calls as well as calls dialed with the FGB access code which require the customer to receive additional address signaling from the end user. Such

(T)(x)

calls will be rated as FGD.

(T)(x)

(x) Filed pursuant to Special Permission No. 94-174 to withdraw material filed under Transmittal No. 2 without it becoming effective.

 Salina, Kansas 67401

VIRTUAL EQUAL ACCESS SERVICE6. Switched Access Service (Cont'd)6.5 Obligation of KNAD (Cont'd)6.5.2 Design and Traffic Routing of Switched Access Service (Cont'd)

Finally, KNAD will decide whether trunk side access will be provided through the use of two-wire or four-wire trunk terminating equipment. Selection of facilities and equipment and traffic routing of the service are based on standard engineering methods, available facilities and equipment, and the KNAD traffic routing plans.

If the customer desires routing or directionality different from that determined by KNAD, KNAD will work cooperatively with the customer in determining the directionality of the service.

6.5.3 Provision of Service Performance Data

Subject to availability, end-to-end service performance data available to KNAD through its own service evaluation routines, may also be made available to the customer based on previously arranged intervals and format. These data provide information on overall end-to-end call completion and noncompletion performance, e.g., customer equipment blockage, failure results and transmission performance. These data do not include service performance data which are provided under other tariff sections, e.g., testing service results. If data are to be provided in other than paper format, the charges for such exchange will be determined on an individual case basis.

6.5.4 Trunk Group Measurement Reports

Subject to availability, KNAD will make available trunk group data in the form of usage in CCS, peg count and overflow, to the customer based on previously agreed to intervals.

6.5.5 Determination of Number of Transmission Paths

KNAD will determine the number of Switched Access (T)(x)

Service transmission paths to be provided for the
Switched Access Feature Groups ordered. A transmission
path is a derived communication path of a frequency (T)(x)
(x) Filed pursuant to Special Permission No. 94-174 to withdraw material filed

VIRTUAL EQUAL ACCESS SERVICE6. Switched Access Service (Cont'd)6.5 Obligations of KNAD (Cont'd)6.5.7 Design Blocking Probability

KNAD will design the facilities used in the provision of Switched Access Service to meet the blocking probability criteria as set forth in (A) through (D) following.

- (A) For Feature Group B, no design blocking criteria apply. (T)(x)
(T)(x)
- (B) For Feature Group D, the design blocking objective will be no greater than one percent (1%) between the customer's point of inter-connection set forth in Section 8. following and KNAD's central access tandem. Standard traffic engineering methods as set forth in reference document Telecommunications Transmission Engineering - Volume 3 - Networks and Services (Chapters 6-7) will be used by KNAD to determine the number of transmission paths required to achieve this level of blocking.
- (C) KNAD will perform routine measurement functions to assure that an adequate number of transmission paths are in service. KNAD will recommend that additional busy hour minutes of capacity be ordered by the customer when additional paths

are

required to reduce the measured blocking to the design blocking level. For the capacity ordered, the design blocking objective is assumed to have been met if the routine measurements show that the measured blocking does not exceed the threshold listed in the following table.

VIRTUAL EQUAL ACCESS SERVICE6. Switched Access Service (Cont'd)6.7 Rate Regulations

This section contains the specific regulations governing the rates and charges that apply for Switched Access Service.

6.7.1 Description and Application of Rates and Charges

There are two types of rates and charges that apply to Switched Access Service. These are usage rates and nonrecurring charges.

(A) Usage

Switched Access Usage Rates are rates that apply only when a specific rate element is used. These rates are applied on a per access minute basis. Usage rates are accumulated over a monthly period.

(B) Nonrecurring Charges

Nonrecurring charges are one-time charges that apply for a specific work activity (i.e. installation or change to an existing service). The types of nonrecurring charges

that apply for Switched Access Service Are: installation of service, Interim NXX Translation Optional feature, and service rearrangements.

(1) Installation of Service

(T)(x)

Nonrecurring charges apply to each Switched Access Service installed. For FGB which is ordered on a per line basis the charge is applied on a per line basis.

For FGD, which is ordered on a Busy Hour Minutes of Capacity or trunk basis,

the charge is applied on a per trunk basis but the charge applies only

when

the capacity ordered requires the
installation or activation of an
additional

trunk(s) which is uniquely
identified for the sole use of the
ordering customer.

(T)(x)

(x) Filed pursuant to Special Permission No. 94-174 to withdraw material filed
under Transmittal No. 2 without it becoming effective.

Salina, Kansas 67401

VIRTUAL EQUAL ACCESS SERVICE6. Switched Access Service (Cont'd)6.7 Rate Regulations (Cont'd)6.7.7 Measuring Access Minutes

(T)(x)

Customer traffic to and from end offices of the Routing Exchange Carriers set forth in Section 9. following will be measured (i.e., recorded) by KNAD at its central access tandem. Originating and terminating calls will be measured (i.e., recorded) by KNAD to determine the basis for computing chargeable access minutes. In the event the customer message detail is not available because KNAD lost or damaged tapes or incurred recording system outages, KNAD will estimate the volume of lost customer access minutes of use based on previously known values. For terminating and for originating calls over FGB and FGD, the measured minutes are the chargeable access minutes.

(T)(x)

FGB and FGD access minutes or fractions thereof, the exact value of the fraction being a function of the switch technology where the measurement is made, are accumulated over the billing period for each end office, and are then rounded up to the nearest access minute for each end office.

(A) Reserved for Future Use.

(x) Filed pursuant to Special Permission No. 94-174 to withdraw material filed under Transmittal No. 2 without it becoming effective.

VIRTUAL EQUAL ACCESS SERVICE6. Switched Access Service (Cont'd)6.7 Rate Regulations (Cont'd)6.7.7 Measuring Access Minutes (Cont'd)(B) Feature Group B Usage Measurement

(T)(x)

For originating calls over FGB, usage measurement begins when KNAD's central access tandem receives trunk seizure acknowledgment from the customer's switch indicating the customer is ready to receive the call.

(T)(x)

The measurement of originating call usage over FGB ends when KNAD's central access tandem receives disconnect supervision from either the originating end user's end office, indicating the originating end user has disconnected, or the customer's switch, whichever is recognized first by KNAD's central access tandem.

For terminating calls over FGB, the measurement of access minutes begins when the terminating FGB point of switching receives an off-hook supervisory signal from the terminating end user's end office, indicating the terminating end user has answered. The measurement of terminating call usage over FGB ends when KNAD's central access tandem receives disconnect supervision from either the terminating end user's end office, indicating the terminating end user has disconnected or the customer's switch, whichever is recognized first by KNAD's central access tandem.

(C) Reserved for Future Use.

VIRTUAL EQUAL ACCESS SERVICE13. Additional Engineering, Additional Labor and Miscellaneous Services (Cont'd)13.2 Additional Labor (Cont'd)13.2.6 Charges for Additional Labor (Cont'd)

The charges for additional labor are as follows: (T)(x)

<u>Additional Labor Periods</u>	<u>Each Half Hour of Fraction Thereof</u>	<u>Central Access Tandem Maintenance Technician</u>
(C) Testing and Maintenance with Exchange Telephone Companies, or Other Labor	<u>Installation and Repair Technician</u>	<u>Central Access Tandem Maintenance Technician</u>
- Basic Time, regularly scheduled working hours, per technician	\$16.00	\$16.00
- Overtime, outside of regularly scheduled working hours on a scheduled work day, per technician	\$24.00	\$24.00
- Premium Time, outside of scheduled work day, per technician	\$32.00	\$32.00

(T)(x)

13.3 Miscellaneous Services13.3.1 Maintenance of Service

(A) When a customer reports a trouble to KNAD for clearance and no trouble is found in KNAD's facilities, the customer shall be responsible for payment of a Maintenance of Service charge for the period of time from when KNAD personnel

are dispatched to the customer point of inter-
connection to when the work is completed

Failure of KNAD personnel to find trouble in
(x) Filed pursuant to Special Permission No. 94-174 to withdraw material filed
